V. Proceeding of the Meeting.

At 08:55, the Presidium proceeded with the meeting in accordance with the agenda.

1. The 2007 Income Statement and 2008 Business Plan Targets.

Mr. Phan Dinh Duc, President of the Company, presented the Statement before the GM.

The GM discussed and stated following main opinions:

- Why was profit target in the 2008 Business Plan lower than realized profit target in 2007 while others were either maintained or increased?

Answer: The 2008 profit target was computed on the basis of the 2008 production plan and 2007 average selling price, to be kept at the minimum. With the fluctuation of product prices in 03 beginning months of 2008 and upcoming trend, realized profit would be likely increased. However, this was just a forecast and it wasn't certain that product selling prices would be maintained at a high level throughout the year, and performance would depend on different factors such as imported product sales, plant maintenance plan, etc. Therefore, the planned target was set at a safe level. The Company would base on actual situation to re-formulate a planned profit target that was no lower than that in 2007.

- Was gas selling price set by Vietnam Oil and Gas Group to the Company adjusted to increase in the upcoming time?

Answer: Gas selling price set to Phu My Fertilizer Plant was approved by the Prime Minister together with the previous approval of the plant construction project of Vietnam Oil and Gas Group with a selling price pathway for the whole project life. It was subject to the Prime Minister's authorities if this price policy would be likely changed.

- It was announced that, in 2008, Phu My Fertilizer Plant would suspend its operations for maintenance and major repair for 1 month; so, was production target of 740,000 tons as planned achievable?

Answer: Design capacity of the plant was 2,200 tons urea/day and could reach over 100% capacity, and total annual standard running days was 337. With such 1-month maintenance and major repair, the plan would run better and more stably for remaining days, so it was possible to reach annual production design.

- How did the Company's Management assess the competitiveness of Phu My Urea product with Chinese urea?

Answer: The quality of Phu My Urea was higher than Chinese products; selling price of Phu My Urea was, in fact, higher than that of Chinese products, but farmers still preferred Phu My Urea.

At the end of the discussion, the General Meeting voted on and passed the 2007 Income Statement and following 2008 key business plan targets:

Production and consumption targets:

- Urea production : 740,000 tons
- Residual ammonia : 35,000 tons
- Residual electricity : 18,000 MWh
- NK fertilizer : 250,000 tons

Economic targets:

- Total revenue : 4,404 billion dong
- Pre-tax profit : 1,190 billion dong
- State budget contribution : 187 billion dong
- Total capital construction investment and equipment procurement: 350 billion dong.

The Board of Directors was assigned the 2008 revenue and profit targets that were no less than the 2007 realized targets.

3. The 2007 Statement of Remuneration, Salary, and Other Benefits of the Board of Directors, Supervisory Board and 2008 Budget Estimation.

Mr. Le Van Quoc Viet, acting on behalf of the Board of Directors, presented the 2007 Statement of Remuneration, Salary, and Other Benefits of the Board of Directors, Supervisory Board and 2008 Budget Estimation.

The GM discussed and voted on and pass the Statement of Remuneration, Salary, and Other Benefits of the Board of Directors, Supervisory Board.

Estimation of remuneration, salary, and other benefits of the Board of Directors, Supervisory Board in 2008 was approved as follows:

- Total salary of a full-time member of the BOD (Chairman of the BOD) and part-time members of the BOD (4 members), remuneration for meetings, and management bonus (BOD and Board of Management) in 2008: **1,925,136,000 VND** (one billion nine hundred twenty-five million one hundred thirty-six thousand dong).
- Total salary of full-time members of the SB (2 members), a part-time member of the SB (1 member), remuneration for meetings, and operating expenses in 2008: **1,176,102,000 VND** (one billion one hundred seventy-six million one hundred two thousand dong).

Total estimation: **3,101,238,000 VND** (three billion one hundred one million two hundred thirty-eight thousand dong)

Voting results:

Number of shares voted against: **14,009,917** shares, accounting for **4.72 %** of eligible voting shares represented at the meeting.

Number of shares without vote: 0 share.

4. The 2007 Financial Statements and Profit Distribution Proposal.

Mr. Pham Thanh Vinh, Financial Vice President, acting on behalf of the Board of Directors, presented the 2007 Financial Statements to the General Meeting.

The GM discussed and stated following main opinions:

- The proceed from the sales of shares on April 21, 2007 was over 8,200 billion dong, so why wasn't there any share premium reflected in the financial statements?

Answer: This was the amount at which the State sold 40% of its shareholdings in PetroVietnam Fertilizer and Chemical Joint Stock Company. In accordance with provisions of the law on equitization of state enterprises, this amount was submitted to the State and the Company transferred it to the state budget (State-Enterprise Restructure and Equitization Support Funds – Ministry of Finance, via the state capital representative, Vietnam Oil and Gas Group).

- It was noted in the Auditor's Report that there was no comparative information on the financial statements, please explain why?

Answer: This was the first accounting period of the Joint Stock Company and there was no previous period figure for comparison.

- The Company paid principal and interest in the 2007 plant construction investment loan after the transformation (27 / 54 million USD) while it had just operated as a joint stock company since September 2007, was there any loss to its shareholders? Was the finalization and hand-over of capital and assets to the JSC confirmed by any agency? why wasn't it reflected in the financial statements?

Answer: This payment of principal and interest had no influence on the interests of both the JSC and state enterprise, because the finalization and hand-over of capital between 2 companies was reflected in liability and carried out in accordance with regulations.

The finalization and hand-over of capital was approved by the competent authority, Ministry of Industry and Trade, on March 20, 2008 after the Audit Report date (March 13, 2008).

- Why were there some medium-and long-term loans converted into short-term loans in the financial statements?

Answer: These were financial statements for the first annual period of the JSC. When the hand-over from state enterprise to the JSC was made, some medium-and long-term loans became due (less than 1 year); therefore, they were converted into short-term loans.

- What were other long-term and financial investments of the Company?

Answer: These were capital contributions in PetroVietnam Drilling Mud Joint Stock Company (DMC) and purchase of bonds in PetroVietnam Finance Corporation. The Company didn't make any investment in securities.

- Would dividend pay-out ratio be increased in the dividend distribution proposal?

Answer: It was planned that dividend pay-out ratio was nearly 70% of after-tax profit (rounded off to 1,000 VND/share), which was very high. In addition to dividend distribution to shareholders, the Company needed to reserve fund for purpose of reinvestment to promote profit growth in the future.

The GM voted on and passed the 2007 Financial Statements and 2007 profit distribution proposal as follows:

- The 2007 profit distribution proposal:

Total after-tax profit (100%):	570,704,004,627 VND
Reserve for financial provision fund (10%):	57,070,400,463 VND
Reserve for development investment fund (15%):	85,605,600,694 VND
Reserve for bonus and welfare fund (4.95%):	28,249,848,229 VND
Reserve for management bonus fund (0.05%):	285,352,002 VND
Dividend pay-out ratio of 1,000 VND/share (66.58%):	380,000,000,000 VND
Undistributed profit (3.42%):	19,492,803,239 VND

- The 2008 profit distribution proposal:

- 30% of after-tax profit was reserved for financial provision fund, development investment fund, bonus and welfare fund, and management bonus fund at similar rates as set out in the 2007 profit distribution proposal
- Distributed profit: 70% of realized after-tax profit.
- The Board of Directors was authorized to decide on the advance of dividend, provided that it would not exceed 70% of distributed profit, when results of operations for 6 beginning months of 2008 were available.

7. The Development Strategy of the Company up to 2015 with Orientation toward 2025.

Mr. Dinh Huu Loc, Chairman of the Board of Directors, reported the Development Strategy of the Company up to 2015 with Orientation toward 2025 to the General Meeting.

The GM discussed and stated following main opinions:

- The projects in the Strategy had only scale and invested capital demand described without other details such as the feasibility, revenue, or profitability. Please explain why?

Answer: These were strategically-oriented projects reported to help the General Meeting understand the development orientations of the Company. Details were not disclosed here because they were confidential and the targets of each specific project would only be determined after taking steps to research the investment in an order manner. However, the BOD considered them as feasible and profitable investment orientations in compliance with business lines and strengths of the Company, and, therefore, included them in the development strategy of the Company.

- It was stated in the Strategy that the Company would invest in fertilizer production projects in foreign countries. So, which were those projects, specifically? which were capital sources? and was there any plan for stock listing or offer in foreign markets?

Answer: Vietnam Oil and Gas Group had a plan to purchase and investment in the exploitation of gas and oil fields in foreign countries and set a guideline to make investment in urea fertilizer plants to consume foreign supply of gas in an efficient manner and provide added value. As a member of the Group, the Company could engage in such investments together with the Group. In addition, the Company was investigating material sources and assessing the efficiency of DAP fertilizer production projects in Morocco. These projects were under initial research stage, and detailed calculations of scale, efficiency, and capital sources, etc. would only be available in the investment preparation stage.

- How did the Company assess various aspects of competitors, consumption markets, and efficiency, etc. of Melamine Project when export was the main activity?

Answer: This Project was under research stage and the Company assessed it as very feasible in various aspects.

The GM voted on and passed the Development Strategy of the Company up to 2015 with Orientation toward 2025 under the Proposal submitted by the BOD.

Voting results:

Number of shares voted for: **296,820,283** shares, accounting for **100%** of eligible voting shares represented at the meeting.

Number of shares voted against: 0 share.

Number of shares without vote: 0 share.

8. The Proposal on Transformation of the Company into the Corporation.

Mr. Phan Dinh Duc, President, acting on behalf of the Board of Directors, presented the Proposal on Transformation of PetroVietnam Fertilizer and Chemical Joint Stock Company into PetroVietnam Fertilizer and Chemical Corporation.

- Opinion of the General Meeting: The transformation of company model into the Corporation would lead to the incorporation of subsidiaries, so did the Company consider if the Corporation and its subsidiaries would be entitled to the corporate income tax preferential policies currently applied to the Company by the state?

Answer: This was an important and very meaningful matter to the Company. The Company Management paid much attention to this matter and it was also stated in the Proposal that a principle was to maintain preferential policies to the maximum extent. Tax preferential policies of the State were first applied to Phu My Urea Plant project. In principle, all of results of operations from this project would be continually entitled to preferential treatment whether the Plant was subsequently under the Parent Corporation or any subsidiary. Certainly, subsidiaries were incorporated to perform new operating tasks and new projects wouldn't be entitled to these preferential policies.

The GM voted on and passed the Proposal on Transformation of PetroVietnam Fertilizer and Chemical Joint Stock Company into PetroVietnam Fertilizer and Chemical Corporation under the Proposal of the BOD.

Voting results:

Number of shares voted for: **296,820,283** shares, accounting for **100%** of eligible voting shares represented at the meeting.
